Marijuana Use in Delaware

Center for Drug & Health Studies

Prevalence

In 2025, **3% of 8th grade students and 10% of 11th grade students** reported using marijuana in the past month.

Young Adult Use

More than a quarter (26.44%) of young adults in Delaware, aged 18-25, reported using marijuana in the past month during 2023 and 2024.

Means of Use

Among 11th graders surveyed in 2025 who had consumed marijuana in the past month:
5% smoked it,
5% ate it,
6% vaped it, and
1% smoked it as concentrated hash or wax.

Perception of Risk Associated with Regularly Smoking Marijuana (%)

When surveyed in 2025 about their perceptions of risk from marijuana use, **39% of 5th grade students** said there was a "lot of risk" smoking marijuana weekly, while **8th and 11th grade students reported similar or lower rates** of feeling "great risk" from smoking marijuana regularly.

This infographic references data reported in the Marijuana Module of the 2026 Delaware Epidemiological Profile, which is accessible online from the Epidemiological Reports and Products page and draws upon the following sources: National Survey on Drug Use and Health and Delaware School Surveys.

This is a publication of the Delaware State Epidemiological Outcomes Workgroup (SEOW) project. Support for this project has been provided by the Delaware Department of Health and Social Services, Division of Substance Abuse and Mental Health through funding from the U.S. Substance Abuse and Mental Health Services Administration (SAMHSA).
