YOUTH & ADULT PRESENTATIONS

Johnny's Ambassadors educates parents, teens, and communities about the dangers of today's potent THC products (marijuana, dabs, vapes, edibles) on adolescent brain development, psychosis, and suicide.

"Adolescent cannabis use is associated with an increased risk for psychosis later in life." *

"Marijuana use in adolescence is linked with an increased risk of depression, as well as suicidal thoughts and attempts before age 32." **
