

*Engage families and communities to promote the safety and well-being of children through prevention, intervention, treatment and rehabilitative services.*

The Family Informed Resource Support Team, or FIRST, has created this interactive Community Directory. This is an easy to navigate dashboard which allows users to filter and search for information on community resources throughout the state.

In addition to the Community Directory Dashboard, FIRST has also compiled a list of statewide seasonal resources and upcoming events.

The Community Directory Dashboard and the “Seasonal Resources and Events” can be accessed on the DSCYF website at <https://kids.delaware.gov/first-community-directory/>. It can also be found by going to the Info tab on the top toolbar on the DSCYF homepage and clicking on FIRST Community Directory.

To print the service directory results, click on the download symbol on the lower right-hand side of the page and select PDF. Then, change the dropdown under 'Include' to say 'Specific sheets from this dashboard', and select 'Service Directory' before clicking the download button.

The screenshot shows the dashboard interface with several key elements highlighted by red boxes and arrows:

- Filters:** Two dropdown menus on the left, 'Type of Service' and 'County Served', are highlighted with a red box. The 'County Served' dropdown is open, showing options for Kent, Kent and Sussex, NCC, NCC and Kent, NCC and Sussex, and Sussex.
- Search Fields:** Two search boxes, 'Organization Name Search' and 'Services Description Search', are highlighted with a red box. Red arrows point to these fields.
- Text Box:** A red-bordered text box in the center contains the text: "Users can filter the dashboard using the key words or partial words to search the Organization Name and Services Description fields."
- Map:** A map at the bottom shows the geographic distribution of services across Delaware, with various locations like Brookside, Christiana, and New Castle marked.

The resources are listed in a table view as a Service Directory as well as in a map view which shows the resources based on their specific geographic location across the state.
