Project Work Plan Section 8

RFP reference: 7.2.8 Project Work Plan, Page 64

Bidders should refer to Section 6 – Scope of Services and Deliverables. At a minimum, this section should contain detailed information for the topics listed below.

Major Tasks and Functions. Bidders should detail the project tasks and subtasks, including dependencies, of the project. Major milestones should be clearly identified.

Project Milestones and Associated Deliverables. Bidders should clearly identify the project milestones and associated deliverables, including the start and end dates for the creation of each milestone, the anticipated delivery date, the start and end dates for the review cycle, and the proposed approval date. Project milestones are tied to payments, which should be clearly identified on the FACTS II Design, Development, and Implementation Cost Sheet (reference Appendix A – Bidder's Instructions and Forms).

Personnel Requirements. The estimated staffing for each task and/or deliverable should be incorporated into the work plan. Contractor, QA Vendor, and Department personnel requirements should be itemized separately.

We propose a realistic work plan that meets DSCYF's goals and encompasses the work required by our combined teams throughout the project. Our Delaware FACTS II work plan presents an approach to meeting the vision set by DSCYF for Delaware FACTS II in a manner that is collaborative, organized, detailed, and business-focused while grounded in using technologies and product platforms that "work" and are "proven" in other similar projects.

Our work plan is the end product of the extensive research and planning conducted by our management, operational, and technical teams during the proposal preparation effort. Each requirement was analyzed and estimated, first as a stand-alone element, and later as part of the total work plan. The effort was then planned using the combination of the major tasks and functions and our structured system development methodology, and as such, represents the required activities and the processes we follow for a successful implementation of Delaware FACTS II. This work plan is designed to provide a detailed understanding of the major tasks and functions, project milestones and associated deliverables, and personnel requirements required to accomplish these tasks.

Our work plan represents the cumulative efforts throughout the FACTS II project

- Realistic and achievable
- Based on prior experience of transferring similar solutions
- Focuses on achieving the vision set for Delaware FACTS II
- Delivers an integrated FACTS II team of Deloitte and DSCYF staff
- Results-oriented plan, focusing on end-user benefits

As required by your RFP, we have included a deliverable-based work plan created in Microsoft Project in our response immediately following this section. The work plan represents the entire life cycle of the Delaware FACTS II project and includes descriptions of all objectives, activities and tasks, relationships to one another, associated timeframes, and resources. The features of our Delaware FACTS II work plan provides many benefits to DSCYF as described in the table below.

| Features | Deloitte's Approach to Meet Delaware FACTS II Requirements |
|---|---|
| Delivering the must-have functionality requested in the RFP | Provides a complete retirement of the existing FACTS I system |
| Relies upon a diverse combined team of Deloitte staff, DSCYF business and technical staff | Fosters coordination and collaboration across diverse stakeholders |
| Considers your business needs for planning the implementation | Allows the Delaware FACTS II project to adapt and react to evolving needs |
| Waterfall approach to implementation | Allows for a complete replacement of the existing FACTS solution |
| | Reduces risks associated with delivery by allowing the deliverables of the prior phase to be reviewed and approved prior to the execution of the next phase |
| Planning and Execution sub-phases | Allows for the planning of the next phase to begin prior to the completion of the next phase |
| | Provides an accelerated delivery by performing tasks that are independent of the approvals of the deliverables of the previous phase |

Table 8-1. Features and Benefits of our Delaware FACTS II Work Plan.

Major Tasks and Functions

RFP reference: 7.2.8 Project Work Plan, Page 65

Major Tasks and Functions. Bidders should detail the project tasks and subtasks, including dependencies, of the project. Major milestones should be clearly identified.

Our work plan is based on the tasks and deliverables you have described throughout the RFP. As part of this methodology, we used a detailed and comprehensive estimation process for our proposed Delaware FACTS II solution work plan. Our estimation model has matured through years of implementing large health and human services systems. Deloitte has the right knowledge, resources, and tools to provide a comprehensive and practical estimation for Delaware FACTS II based on our previous experiences. We have carefully considered factors and attributes in our estimation based on our experience and lessons learned from implementing similar projects. A responsible work plan requires an understanding of how to take major tasks and break them into manageable segments of work. Our definitions of our work plan entities are as follows:

Our Delaware FACTS II Work Plan:

- Considers DSCYF staffing requirements
- Leverages proven knowledge used by other states
- Based on deliverables with 33 months to statewide Go-Live
- **Functions.** Each function (or Activity) represents the largest component of the work plan indicating a step in the project life cycle. These functions or activities are consistent with the activities defined in the RFP.
- Tasks. Successful development and delivery of a work plan starts with understanding the major tasks associated with a project. For Delaware FACTS II, each function or activity is broken down into tasks and subtasks. These tasks and subtasks are deliverable based. The deliverables are consistent with those identified in the Delaware FACTS II RFP.
- Interrelationships. For Delaware FACTS II, the Project Management portion serves as the guiding interrelationship that is sustained across the entire project. This interrelationship provides support to the subsequent tasks and brings an ongoing cohesive process to the implementation of Delaware FACTS II.
- Dependencies. As functions/activities, tasks and subtasks are created, it is important
 to have a clear picture of the necessary order of events. While some tasks may be done
 simultaneously, others cannot be started until their predecessor has been completed.
 For each function/activity, task and subtask, correlating dependencies are established
 within the work plan where appropriate. Our Microsoft Project work plan provides a clear
 picture of these dependencies.

We have highlighted the major functions/activities and tasks of our work plan below. Please refer to the Microsoft Work Plan immediately following this section for the subtasks and the dependencies.

| Major Delaware FACTS II Functions/Activities and | Tasks |

Table 8-2. Key Functions and Tasks.

Project Milestones and Associated Deliverables

RFP reference: 7.2.8 Project Work Plan, Page 65

Project Milestones and Associated Deliverables. Bidders should clearly identify the project milestones and associated deliverables, including the start and end dates for the creation of each milestone, the anticipated delivery date, the start and end dates for the review cycle, and the proposed approval date. Project milestones are tied to payments, which should be clearly identified on the FACTS II Design, Development, and Implementation Cost Sheet (reference Appendix A – Bidder's Instructions and Forms).

Project Milestones. Milestones are completion points and generally mark the end of an activity or group of activities. For Delaware FACTS II, our milestones are marked by the deliverables requested by the RFP.

Associated Deliverables. The RFP defines the specific deliverables DSCYF requires for the completion of FACTS II. Deliverables are designated as an activity within the work plan. Each deliverable encompasses preparation, submission, review, and approval activities. Our documentation is represented by the artifacts derived during the preparation of the deliverable.

The following graphic shows the Delaware FACTS II project timeline followed by the table of key milestones and associated deliverables for the project.

Figure 8-1. Project Timeline.

Delaware FACTS II Milestones and Associated Deliverables

The Delaware FACTS II Project Work Plan Timeline (figure that follows) reflects the start and end dates for each milestone.

Although not identified as a key milestone for Delaware FACTS II, Support for Federal Review and Conversion are critical elements of the Delaware FACTS II project plan. Support for federal review occurs throughout the project from Project Initiation through Post Implementation. Note that the project plan depicts a duration of 10 days for the Support Federal Review phase which comprises only of creating the required documentation templates. However we understand and incorporate the full set of federal requirements throughout the duration of the project which confirms that the full set of requirements that meet federal mandates are integrated into the solution. This approach saves time and reduces cost. (Additional details on our Federal Review process and approach are found in Section 4.18)

The following table depicts the anticipated delivery date of each milestone, as well as the review cycle start and end dates, and the proposed approval date.

| Milestone | Ctort Data | Fuel Date |
|--|------------|------------|
| Milestone | Start Date | End Date |
| Activity 6.5 Project Initiation & Management | 7/5/2011 | 1/14/2014 |

Table 8-3. Milestone Start, End, Delivery, Review and Proposed Approval Date.

Personnel Requirements

RFP reference: 7.2.8 Project Work Plan, Page 65

Personnel Requirements. The estimated staffing for each task and/or deliverable should be incorporated into the work plan. Contractor, QA Vendor, and Department personnel requirements should be itemized separately.

Approach to Estimating Staffing

Numerous factors are carefully considered in the development of a work plan and staffing requirements in order to confirm that proper timeframes and adequate resources are allotted for timely delivery of services. Our Delaware FACTS II Work Plan is based on an assumption of five work days per week and eight work hours per day. This allows the maximum flexibility to respond to any contingencies that may arise. In combination with these factors, the following steps were also employed to develop the time estimates needed to accomplish the required tasks.

- 1. Analysis and evaluation of the RFP and requirements
- 2. Mapping of requirements to proposed solution
- 3. Gap analysis based on our proposed solution
- 4. Bottom-up estimation of tasks and activities needed to complete the project
- 5. Optimization and prioritization of tasks in the work plan
- 6. Rationalization of level of effort with anticipated efficiencies gained by performing similar functions together

This estimate is then combined for a functional phase of the project to develop the overall timelines and effort, which are detailed in the Work Plan, which can be found immediately following this section. The figure that follows depicts how these factors resulted in our realistic and achievable work plan for Deloitte's proposed Delaware FACTS II solution.

Creating a Realistic and Achievable Work Plan

Figure 8-2. Deloitte's Realistic and Achievable Work Plan.

Deloitte's CAFÉ Methodology, understanding of DCFS, and our experience results in a realistic and achievable work plan for DCFS.

In this section we describe the following:

- Estimated Staffing. High-level overview of the staffing teams across tasks, as well as an overview of the team responsibilities.
- QA Vendor and DSCYF Department Personnel Requirements. Itemized separately from the Deloitte team staffing estimates.
- Project Work Plan Resource Report. Detailed resource reports for each team, generated from our proposed Delaware FACTS II Work Plan details the staff resources assigned across each task.

The Deloitte Team

The Deloitte Team structure is based on an assessment of tasks to be performed and the scope of our Delaware FACTS II work plan. Teams are comprised of experienced Deloitte personnel who have managed and delivered similar SACWIS projects. (Additional details on the Deloitte team are found in *Section 5.0*).

- **Project Management Team.** Overall management and day-to-day responsibility for managing the project.
- Functional Team. Manages day-to-day activities of all functional team activities related to requirements determination, design, development, unit testing, and co-partner configuration management activities.
- **Technical Team.** Activities relating to the project's technical architecture, software architecture, configuration management, and infrastructure. Also, responsible for design, development and unit testing of interfaces.
- Reports Team. Responsible for design, development and unit testing of all reports.

- Conversion Team. Conducting and completing the conversion analysis, developing the conversion strategy, the design, development, testing, and execution of the conversion programs
- Testing Team. Leads the testing team through the testing phases
- Implementation Team. The Implementation team has responsibility for managing all tasks related to training and implementation support
- Training Team. Planning training, developing training curricula and training materials, Computer Based Training (CBT), determining the training schedule, coordinating/registration of training, and training delivery.

Summary Work Schedule

RFP reference: 7.2.8 Project Work Plan, Page 65

Summary Work Schedule. A summary work schedule should show a high-level view of the project work plan, emphasizing major milestones and key project deliverables. Key project deliverables should be clearly identified on the FACTS II Design, Development, and Implementation Cost Sheet (reference Appendix A – Bidder's Instructions and Forms).

The following summary work schedule (table below) represents a high-level view of the project work plan.

| Delaware FACTS II Major Activities | Duration | Start Date | End Date |
|--|----------|------------|------------|
| Activity 6.5 Project Initiation & Management | 660 days | 7/5/2011 | 1/14/2014 |
| Activity 6.6 System Hardware | 31 days | 7/19/2011 | 8/30/2011 |
| Activity 6.7 System Planning & Analysis | 38 days | 7/18/2011 | 9/7/2011 |
| Activity 6.8 Requirements Verification | 109 days | 7/15/2011 | 12/14/2011 |
| Activity 6.9 System Design | 117days | 10/17/2011 | 3/27/2012 |
| Activity 6.10 Reports | 110 days | 12/19/2011 | 5/18/2012 |
| Activity 6.11 Interfaces | 163 days | 11/17/2011 | 8/14/2012 |
| Activity 6.12 System Development | 182 days | 12/5/2011 | 8/14/2012 |
| Activity 6.13 Testing | 297 days | 1/2/2012 | 2/19/2013 |
| Activity 6.14 System Training | 326 days | 2/20/2012 | 5/20/2013 |
| Activity 6.15 Conversion | 372 days | 10/10/2011 | 3/12/2013 |
| Activity 6.16 System Implementation | 296 days | 1/30/2012 | 3/18/2013 |
| Activity 6.17 Post Implementation Support | 210 days | 3/18/2013 | 1/3/2014 |
| Activity 6.18 Support Federal Review | 10 days | 3/18/2013 | 3/29/2013 |

Table 8-4. Deloitte's Summary Work Schedule.

Staffing Estimate Summary

RFP reference: 7.2.8 Project Work Plan, Page 65

Staffing Estimate Summary. The Staffing Estimate Summary should show a high-level view of the staffing requirements for the entire project. Contractor, QA Vendor, and Department staffing requirements should be summarized separately.

The Work Plan Resource Report (table below) drawn from the project plan, shows high-level activities and the teams responsible for these activities. It also represents the involvement of the DSCYF staff and the QA vendor. The responsible activities are given separately for each of DSCYF, QA Vendor and Deloitte staff.

| Responsible Team | Delaware FACTS II Activities |
|--------------------------|---|
| DSCYF Staff | Activity 6.5 Project Initiation & Management Activity 6.6 System Hardware Activity 6.7 System Planning & Analysis Activity 6.8 Requirements Verification Activity 6.9 System Design Activity 6.13 Testing Activity 6.14 System Training Activity 6.16 System Implementation Activity 6.17 Post Implementation Support Activity 6.18 Support Federal Review |
| QA Vendor | Activity 6.6 System Hardware Activity 6.8 Requirements Verification Activity 6.9 System Design Activity 6.13 Testing Activity 6.14 System Training Activity 6.15 Conversion Activity 6.16 System Implementation Activity 6.17 Post Implementation Support |
| Deloitte Functional Team | Activity 6.8 Requirements Verification Activity 6.9 System Design Activity 6.10 Reports Activity 6.11 Interfaces Activity 6.12 System Development Activity 6.13 Testing Activity 6.14 System Training Activity 6.15 Conversion Activity 6.16 System Implementation Activity 6.17 Post Implementation Support |

| Responsible Team | Delaware FACTS II Activities |
|----------------------------------|--|
| | Activity 6.18 Support Federal Review |
| Deloitte Technical Team | Activity 6.8 Requirements VerificationActivity 6.13 Testing |
| Deloitte Training Team | Activity 6.14 System Training |
| Deloitte Implementation Team | Activity 6.16 System Implementation Activity 6.17 Post Implementation Support Activity 6.18 Support Federal Review |
| Combined Project Management Team | Activity 6.5 Project Initiation & ManagementActivity 6.7 System Planning & Analysis |
| Deloitte Reports Team | Activity 6.10 ReportsActivity 6.16 System Implementation |
| Deloitte Testing Team | Activity 6.8 Requirements VerificationActivity 6.13 Testing |

Table 8-5. Delaware FACTS II Work Plan Resource Report.

The Delaware FACTS II Work Plan structure provides the preliminary project work plan that with all milestones, deliverables, tasks, subtasks and resource assignments. Deloitte work with DSCYF Project Management to review detailed activities and the project schedule, and submits the final work plan as the required deliverable.
